

27 RADIO SHOWS ON COVID-19 FUND ACCOUNTABILITY AND VACCINATION

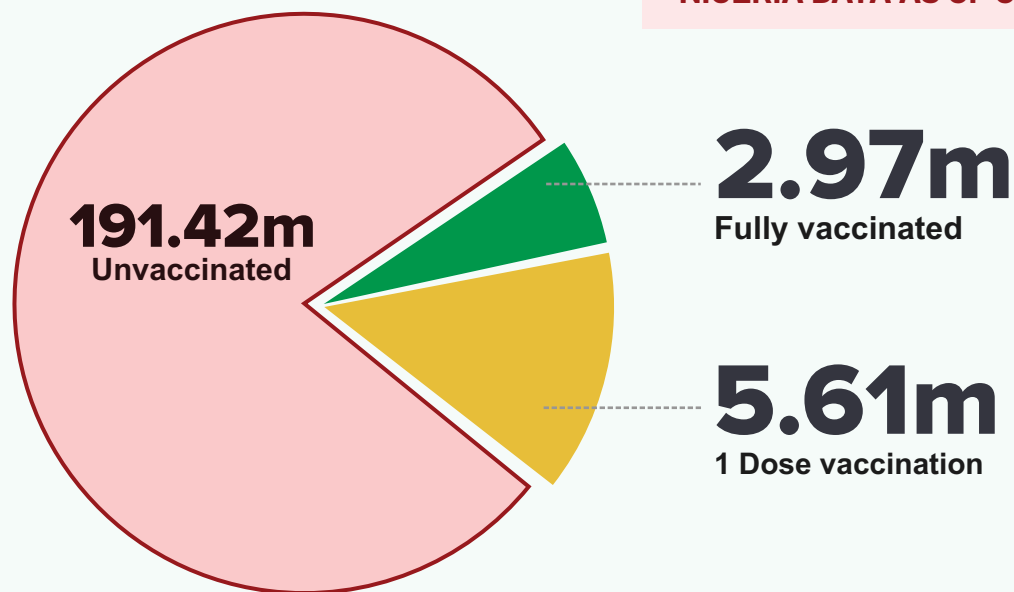

COVID-19 was first reported in **Wuhan, China**, before spreading worldwide, with most governments totally unprepared. Our reality as we knew it changed, leaving us with no option but to embrace what has now become the 'new normal'.

Nigeria's first case was **February 27, 2020** and according to the **Beating Corona** report published by **The Future Project**, over **3.65 billion dollars** has been received as COVID-19 donations/interventions, unfortunately, the spending of these funds have been trailed with controversy on accountability.

Researchers have developed **several vaccines to help fight against the deadly virus**, the fastest development of a vaccine in human history. However, these vaccines have been the subject of several conspiracy theories and a lot of people have refused to take them.
