

ACCOUNTABILITY OF COVID-19 DONATIONS

2.0

In response to the COVID-19 pandemic, individuals and companies donated to several organisations and governments. While a number of them have shown transparency by appropriately disclosing donations and disbursements, others have not been fully accountable for the monies and items received in a manner that is easy to track.

Cash donations received in May provided. Not compliant with its own guidelines.

- NO
- YES

* FG guidelines include publishing statements of daily inflows, outflows and source of the COVID-19 funds; daily payment report indicating the beneficiary, purpose of payment and the amount for any payment above N5 million. All are to be published on www.opentreasury.gov.ng within a week.

The Nigerian government's disregard for its own guidelines is consistent with its lack of transparency and accountability and it is unacceptable. We encourage the public/private sector to show transparency and accountability by adopting [Jack Dorsey's #StartSmall](#) template which shows his donation and each disbursement with amount, recipient and purpose.
